

Student Grant Guidelines 2023

Students attending Graphene Study 2023 and submitting an abstract (as first or second author) may apply for a student grant from the Graphene Flagship. Please read the application requirements closely and follow the instructions (see below). Incomplete or ineligible applications will not receive funding.

The purpose of this support programme is to encourage and promote the professional development of students in the field. It is considered an important tool for fostering the next generation of graphene researchers and a key element in the continuous renewal of the Graphene Flagship community.

Eligible students may apply to receive a **300 Euro discount** on the delegate fee. Only early-bird applications will be considered for a Graphene Study 2023 grant. First come, first served.

Student grants are available for a limited number of students (**50**) planning to attend Graphene Study 2023. Applications for student grants are made through the registration form.

Who can apply?

Please be aware of the following eligibility criteria for the student grant:

- A poster must be presented. Its contents must be in line with the topic description in the call.
- Student (Bachelor, MSc, PhD or Post-PhD) who are involved in graphene and related materials research activities.
- Open to all nationalities (however, the candidate needs to work in a research institution/organisation).
- Fluent in English.
- Gender balance is considered in the evaluation.

Application Checklist

1. Register and check if you received the confirmation with the correct details of your booking.
2. Application and supporting documents are written/presented in English.
3. Students entitled to student grants will be notified via email after the assessment of their application. (50 student grants available)
4. If you received the Graphene Flagship confirmation email that you are entitled to receive a Graphene Study Student Grant, an invoice will follow for payment (the registration fee will be reduced by 300 Euros).
