Join us!

The [15th edition of Graphene Week](#) presents an invaluable opportunity to showcase and engage with potential customers and industry leaders.

PRELIMINARY TOPICS

Fundamentals

Electrical properties and phenomena
Optics and Plasmonics
Optoelectronics
Physics, Mechanics and Magnetism
Spintronics
Surface chemistry

Growth and Processing

Device processing and process scale-up
Exfoliation related methods
Functionalization
Production, Innovation and Industrialization
Synthesis and Growth

Applications

Biomedical Applications
Composites
Electronics
Energy harvesting, conversion and storage
Environment, Safety and Sustainability
Membranes, nanofluidics & filters
Paints, Foams, and Coatings
Photonics and Optoelectronics
Sensors
Wearables and flexible devices

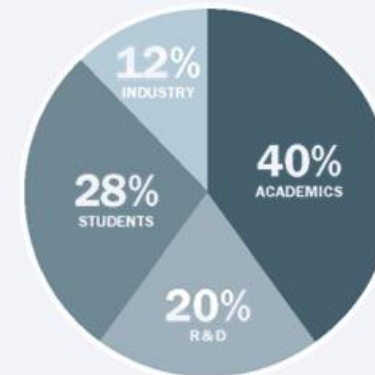

Other Topic

GRAPHENE WEEK BY THE NUMBERS

90%

VISITOR SATISFACTION

VISITOR PROFILE

50

COUNTRIES REPRESENTED

Keynote speakers

Kin Fai Mak
Cornell University, USA

Kristina Edström
Uppsala University, SE

James Hone
Columbia University, USA

Dusan Losic
University of Adelaide, AU

Maurizio Prato
University of Trieste, IT

A new virtual graphene experience

Graphene Week will bring together the latest innovations and leading-edge technology and research on graphene from experts related to industry and academia.
